## Summary

Full-stack software developer specializing in AI platform engineering: LLM gateways (LiteLLM), MCP servers, LLM-as-judge pipelines and spend analytics, built with TypeScript, React, PostgreSQL and Azure. Claude Certified Architect (CCA-F).

## Technical Skills

**Languages**: TypeScript, JavaScript, Python, Java, C++, SQL
**AI / LLM**: LiteLLM, Model Context Protocol (MCP), LangChain, LangGraph, Retrieval-Augmented Generation (RAG), LLM-as-Judge, Claude API, OpenAI API, n8n
**Frameworks**: React, Node.js, Fastify, FastAPI, Spring Boot, Tailwind CSS
**Cloud & DevOps**: Azure (AKS, Front Door, APIM), Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, Jenkins
**Databases**: PostgreSQL, MySQL, MongoDB
**Testing & Auth**: Playwright, Selenium, Cucumber, TestNG, OAuth 2.1, Auth0

## Experience

**Synapx** **Jul 2026 – Present**
*Software Developer* *TypeScript, Fastify, React, PostgreSQL, LiteLLM, Azure AKS*

- Developed **AIMS**, a multi-tenant AI governance platform managing $10k+ monthly API spend via short-lived, model-scoped **LiteLLM** gateway keys; merged 400+ commits across the API and VS Code extension.
- Engineered **MCP server OAuth 2.1** (authorize, token, revoke) with session inventory to securely attribute Claude Code and Copilot activity for 50+ internal developers.
- Architected **LLM-as-judge** features: a Standards Reviewer that automates 75% of pull-request check-runs by judging diffs, and a project qualifier that scores 100+ new AI project requests each month.
- Enforced phase **budgets** at gateway key issuance, reducing unauthorized spend by 30%.
- Added latency and time-to-first-byte (TTFB) percentiles from 1M+ spend logs to benchmark gateway load tests.

**Computelib** **May 2026 – Jul 2026**
*Software Developer (Part-time)* *React, FastAPI, Shopify, n8n, GraphQL, Claude API*

- Built **Reviewgenie AI**, a Shopify app that processes 5,000+ monthly reviews through **n8n**, scores revenue at risk with **Claude**, and speeds up helpdesk ticket resolution by 40%.

**HashedIn by Deloitte** **Oct 2025 – Nov 2025**
*Intern* *FastAPI, LangChain, LangGraph, MCP, RAG*

- Designed an AI research chatbot with **LangChain** and MCP tools that queries a vector database of 10,000+ OpenAI embeddings via **RAG**, improving response accuracy by 50%.

**Nomura Holdings** **Jun 2024 – Dec 2024**
*Intern* *Selenium, Cucumber, TestNG, Java, Jenkins, GitLab*

- Expanded **Selenium** and Cucumber end-to-end test suites to over 95% coverage and improved Jenkins and GitLab CI pipelines, cutting execution time by 80% and saving 50+ hours of manual testing per month.

## Projects

**Globalgrad** | *FastAPI, React, PostgreSQL, Google OAuth, LiveKit* **GitHub** | **Live Demo**

- Created a full-stack study-abroad guidance platform for 1,000+ students, raising onboarding completion by 35% with cookie-based JWT authentication and Google OAuth.
- Integrated a real-time **LiveKit** voice AI counselor into university discovery flows, handling 500+ daily inquiries and reducing reliance on live counselors by 60%.

**Multi-User Code Editor** | *React, Redux, TypeScript, FastAPI, WebSockets, Monaco, PostgreSQL* **GitHub**

- Implemented a real-time collaborative code editor for 50+ concurrent users, using WebSocket sync and debounced persistence to reach sub-50 ms latency for in-memory edits.

## Education

**Indian Institute of Information Technology Pune** **May 2025**
*Bachelor of Technology in Computer Science* *CGPA: 7.68*

## Certifications

**Claude Certified Architect – Foundations (CCA-F)**, Anthropic Verify Credential

## Achievements

- Earned LeetCode Knight status (peak rating 1846) and ranked 1,800th globally in LeetCode Biweekly Contest 466.
- Solved 750+ data structures and algorithms (DSA) problems across coding platforms.
